I was dismissed for many years by my GP, miss-diagnosed with IBS and never offered any real help or treatment... Dr Patodi was extremely understanding and listened to my concerns. For him my symptoms were not 'normal' and he was determined to find a cause. As a result and after over 12 years of gastro issues, I was diagnosed with macroscopic (collagenous) colitis and honestly, it is a relief to finally know! I can now research my best diet options, connect with relevant communities and follow the relevant treatment path. Thank you so much Dr Patodi, I am forever grateful.

Yesterday I received the most wonderful care at West Berkshire Hospital. Every member of staff was kind considerate and helped me through a difficult procedure. I was cared for in a way that made me feel relaxed and looked after.  
The team in the colonoscopy department are all so friendly and kind. Nothing is to much trouble.  
Dr Patodi was brilliant. He listened, he was kind, considerate and took a lot of care in the procedure I had to have. I would recommend him to anyone and I am hoping that every time I go back I will be seen by Dr Patodi.  
Thank you for making what has been unbearable, bearable. You truly are a kind man.

I was not looking forward to my appointment with DR. Nishant Patodi as he was ,I thought, about to give me bad news after my recent scan at west berks hospital.  
He spoke quietly and clearly and immediately I felt a great sense of relief as he explained every detail of the result and the way forward. All my queries were answered in a clear and concise way.  
He is a gentleman and an absolute credit to the NHS.

First time meeting with Dr Patodi who I was extremely impressed with. Not only did he take time to consider all aspects of my complex condition, but he also took time to consider my background and where I lived which I thought was excellent. He asked a lot of questions which immediately made me feel that my situation was being taken seriously. He also constantly compared what I was saying with my medical history on record both at the RBH and QEH. Again this impressed me a lot. This all took time and he explained what he was doing. Having considered everything, Dr Patodi came up with a plan for the short and medium term which I approved of. Blood test was quickly arranged, and importantly I am hopeful that his suggested actions which take place very soon. From a personal perspective, I thought Dr Patodi was a really decent chap.

Saw Dr Patodi for an initial consultation as was suffering from repeated acid reflux/indigestion issues. Was worried something more sinister may have been the cause. He was so kind and understanding and suggested an endoscopy to ensure nothing was wrong and was very reassuring about the procedure both in advance - and on the day. The procedure was done with the utmost professionalism and Dr Patodi and his team were exceptional. Very clear on the results and he discussed with me there and then and showed me photos. Mercifully nothing was found. I can not recommend him enough. Very easy going and friendly and uses layman's terms to help describe things - and clearly knows exactly what he's doing in this area of medicine.

I started to see Dr. Patodi in Summer 2021 for Constipation issues that I had. He listened very well and talked through the options available to me to help improve my situation. Unlike other doctors, where sometimes there is a push to fix the problem with medication, he took time to understand my diet and levels of physical activity. Based on the fact I was fit and healthy in terms of eating and exercise, he recommended some things to incorporate in my diet. After some time my situation improved but then I was back to having issues and we agreed to do a Colonoscopy in November 2021. Dr. Patodi managed the procedure swiftly but sensitively, explaining along the way and showing me the live video. He really put me at ease (the prep for it was awful at home but nothing he could have done about that) and I am happy knowing all was ok and this is just something I need to manage through Fybogel and my diet. No question was too big or small and he put me at the heart of it all - thank you!

I also want to say that his secretary, Sally Allen is fantastic! She is super organised, prompt and also helped put my mind at ease.

I had a colonoscopy at the West Berkshire Community Hospital under the care of Dr Nishant Patodi. He warmly greeted me putting me at ease and explained the procedure, also checking if I had an understanding of why I was having the Colonoscopy. He talked me through the stages when he was carrying out the procedure. Dr Patodi then explained his diagnosis and telling me what the follow up would be, reassuring me the whole time. I had total confidence in him and it was so reassuring to deal with a caring professional. The Department was obviously extremely busy yet I felt I was still important and not a burden. Thank you.

This was a worrying procedure (endoscopy followed by colonoscopy), both in terms of how it was going to go, and the expected outcome.

In the event, it was much better than I feared; the couple of days preparing at home were much worse.

I was talked through what to expect and I was able to see the procedures on screen, and I went away with a printed report.

Physically, the endoscopy was harder than the colonoscopy, but I was reassured by Olie who talked me through it minute by minute "you can do this" "we're nearly there..." obviously, I was not physically able to ask questions while the procedure was underway.

In the colonoscopy, I was able to ask Dr. Patodi to explain what I saw on the screen, and he went back a few centimetres a couple of times to explain and reassure me that what I was seeing was normal for my age. He was calm, controlled and reassuring at all times.

He explained that the report might be delayed, due to the slowness of the software. In fact he hand-delivered the report to me within minutes while I was changing into my clothes to go home, long before I was actually allowed to go!.

It was a real bonus that the 2 procedures were performed consecutively, rather than returning to the ward in between and waiting for the second.

In addition to my praise of Dr. Patodi, I would like to record my appreciation of the other staff in the theatre - Olie, Kate, Hannah, and Shelagh. My impression of the whole set-up in the West Berks Community Hospital was great, from the minute that I arrived to the minute I left. I'm aware that I haven't mentioned the nurse who completed my check-in. She was equally good and reassuring - sorry I didn't catch her name!

Covid precautions were rigorous and reassuring.

My consultation with Dr Patodi today was excellent, this is the first time I had seen him. After a considerable time of frustration for me about hesitation with initiation of new treatment despite multiple flare ups of my condition, Dr Patodi listened to me, assessed my condition, discussed my options with me and moved to initiating the next step for me along my treatment pathway. He discussed the potential medications and the clinical trials associated with them. He was very patient and reassuring, and extremely thorough, ensuring all the necessary plans were in place before I left the consultation. He has lifted a huge weight off my mind and I feel optimistic about the possibility of my condition improving.

Dr Patodi performed a colonoscopy for me- a procedure which I had had a long time ago. However, unlike my previous experience, although I was kept entirely free of any discomfort through out, I was not heavily sedated this time, so I could see the monitor exactly and view what the doctor could see in real time. Dr Patodi talked to me through out, clearly explaining his observations and the procedure wrt to polyp removal and taking biopsies and answered my questions. I found the whole experience very informative and also very reassuring. I would strongly recommend him if you need a colonoscopy.

I visited Dr Patodi after I started to experience bowel problems. The initial consultation was great and he speedily arranged a Colonoscopy for the following week.

The Colonoscopy was smooth. Even though I opted not to have sedation, Dr Patodi went to great lengths to manage the small amount of pain at one stage. He talked me through every stage and even gave me the 'guided tour' by explaining what he was seeing on the screen. I felt very comfortable. Afterwards he explained the Colitis that he'd discovered and immediately prescribed medication for me to take with me when I went home.

I had a further follow up appointment a few weeks later to review the biopsy results - Dr Patodi was great at explaining everything and talking about my treatment options for UC. I was able to ask lots of questions and he patiently answered them by giving me a full explanation.

I'm very pleased with Dr Patodi and will continue to visit him to review and manage my UC.

Dr Patodi was fantastic! Having had several colonoscopies which I found painful I was nervous. Dr Patodi made me feel at ease and talked me through everything. He warned me when the pain would increase but explained why and showed me on the screen where the camera has to get to for the pain to stop. This helped me so much as I could push through seeing the end of the pain getting close. Before when it has hurt like this it was frightening as I didn't know why it was hurting or for how long it would hurt. I can honestly say this was the least painful procedure I have ever had. I felt informed at all times and with only gas and air the procedure was fine. I would highly recommend Dr Patodi and I will definitely ask for him for future colonoscopies.

Dr patodi took over my care a few years ago and he has been a god send for me and my health.  
He listens and takes on board how I feel and what I have to say.  
He makes me feel so confident in our decisions we make together and he makes sure I understand and feel comfortable with the discussions we have.  
There is always a plan forward and always advice available from him and his team.  
I appreciate their expertise and support. And feel very fortunate that my health is in thier care.

I had an impression of deep knowledge of his topic and I felt after the session very confident that he will resolve my health issue conclusively. Overall very happy and he is clearly excellent at what he does.

Only improvement suggestion relates to my nature as smb who understates problems and finds it difficult normally to ask for help. I feel we went through the symptoms a bit quickly. Perhaps there are some coaching or questioning techniques (e.g. mirroring or labelling - taking a leaf from a negotiator's handbook) that could be getting the full story out of guys like me.

great guy .a truly caring and professional man.Given the speciality being made to feel comfortable and knowing anything can be discussed is vital and you can discuss anything and not be judged. I always know that he will act on any information and come up with a practical approach where I am kept informed at every stage. My care has been excellent given that I have had some difficult problems, and his communication with other specialists and the GP has been on point and really helpful.

The whole experience was very friendly and extremely professional. I was not left at any time apart from undressing and getting ready for the procedure. In theatre I was very involved in everything that was happening to me getting a guided tour of my inner workings with minimum pain relief. The bonus was there was nothing too serious diagnosed so that was a relief. Back on the ward I was looked after very well with all my obs. being checked thoroughly before allowing me to drive home.

Dr Patori has been totally proactive in treating my condition (Ulcerative Colitis). From explaining the pathway of treatment options to recommending the right one for me. Dr Patori has been totally professional throughout and I am looking forward to continuing to be in his care. He delivers his profession with enthusiasm and will always answer any questions I have with full and frank answers.

I am so grateful to Dr Paodi for taking the time and listening to my issues & concerns regarding my health over the last 20 months. He has been thorough and conscientious in ensuring that an outcome was reached and been reassuring during this time carrying out tests and reviewing the outcomes of results. Without Dr Patodi I am not sure I would have got the answers I needed to be able to resume normal life now that my issues have been addressed and sorted.

Dr Patodi has been my doctor for over 5 years. He always provides reasoning to why a particular course of action is being taken and listens to my concerns. He has a great ability to put my mind at ease. He is attentive and patient, and has always provided me with the highest level of care, going above and beyond to provide me with support and assurances. He has an excellent team at RBH. I feel honoured to have him as my doctor and would not hesitate to recommend him to others.

I was seen by Nishant at Spire Dunedin hospital for one of my issue with bowel movements. I am an anxious person and with COVID crisis, it didn't help the cause further. Nishant very professionally dealt with the situation, diagnosed the problem in an analytical way and help eased my anxiety. He recommended certain tests and also clearly explained it to me. He asked right questions to me and almost told me the results of my tests prior doing it. He was v helpful, supportive and is very knowledgeable in what he does. I will recommend Nishant any day to people looking for an able Gastroenterologists who can provide right advice. Thanks a ton Nishant.

Dr Patodi was very caring and listened to my own and my wife's concerns. He answered questions simply but explained fully in detail. He didn't rush our consultation and really showed an interest in the symptoms experienced. Dr Patodi suggested a new treatment and also gave additional information in respect of covid19 shielding, referred to external websites and offered to write a generic letter with his recommendation to shield.

Dr Patodi did what he promised, which was to arrange an urgent scan and also followed up personally with a telephone call 72 hours later confirming blood test results. Thank you Dr Patodi, I am assured I am receiving good care.

I saw Dr Patodi for a colonoscopy on Saturday 16 January at the West Berkshire Community Hospital. I was naturally nervous but I was quickly put at ease by Dr Patodi and his team. Everyone was kind and considerate from beginning to end, the procedure was carried out swiftly and efficiently and I trusted Dr Patodi implicitly. Everything was explained to me as we went along as I was able to watch the procedure on a screen. I would also like to say how grateful I am to the entire team who so kindly looked after me: Victoria, Maria and Helen on the Day Surgery Unit, and Dr Patodi and his team in the theatre - and special thanks to Steve with his good humour and smiles and who let me hold his hand throughout! Thank you to everyone - you are amazing and I am so grateful to you all.

I am very lucky to have been under the direct care of Dr Patodi for Inflammatory Bowel Disease and Primary Sclerosing Cholangitis for the past year. I am extremely satisfied with the care I have received. Dr Patodi has been very thorough with his investigations into my conditions and has prescribed me the best possible treatments - which have made an enormous difference to my health and quality of life. Dr Patodi is very kind, friendly and easy to talk to and listens carefully to my concerns. He gives me plenty of time to discuss my problems or worries and he understands how my diseases affect my daily life. Through the IBD helpline at RBH I have been able to easily get a message to Dr Patodi if I have had any issues between appointments. This has been invaluable. I would not hesitate to recommend Dr Patodi to anyone.

Hello my name is Pablo F. Garcia and I had a colonoscopy at royal Berkshire Hospital one week ago. As a patient I really want to thank Dr "Nishant Patodi" for the amazing job he performed to myself, he is a great professional and a great person. Also I would like to thank all the nursing team and the receptionists in the "Endoscopy unit", excellent attention, communication and service. I am extremely happy because It's been an amazing experience.
